ProHire uses Aspose.Words for .NET to Convert Word Documents

ProHire is the workforce solutions leader in the United States. One of thei=
r requirements is to convert MS Word Documents resumes into a clean and con=
cise HTML format with high fidelity and that integrates into their existing=
.NET Stack.

Aspose.Words solved this problem for ProHire by easily integrating into the=
ir existing .NET Stack and cleanly parsing Word Documents to HTML. Aspose.W=
ords produced results with the highest fidelity when compared to other solu=
tions. Read the case study<https://campaign.banckle.com/api/userSupport/uui=

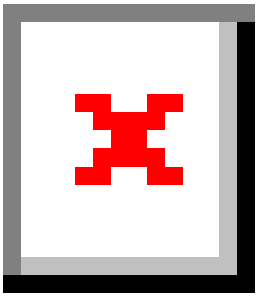
One **Guaranteed Solution** for all your

PDF Processing Problems

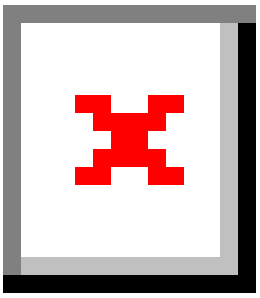
It's super-easy to manipulate and convert PDF files with Aspose.PDF

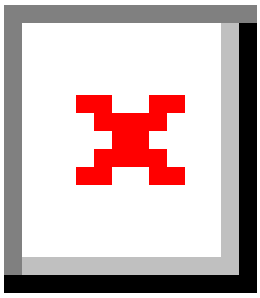
Aspose.Pdf is a set of **PDF Processing APIs** to Create, Read, Edit, Convert, Protect, Sign and Print PDF documents without installing Adobe Acrobat.

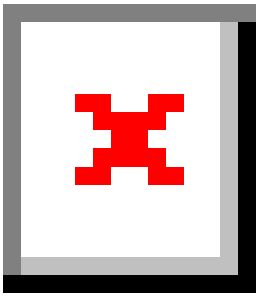
Try out fully featured Demos, Examples, Plugins, Showcase projects and a comprehensive Documentation to take a start from.

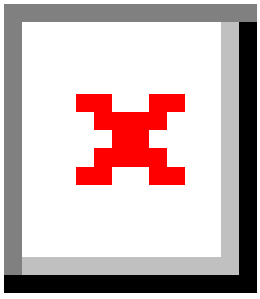


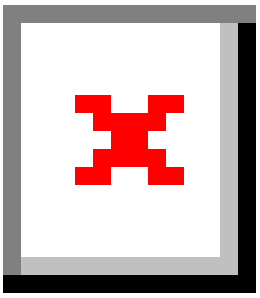
Available for:

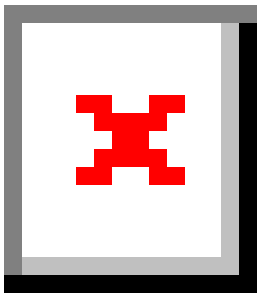


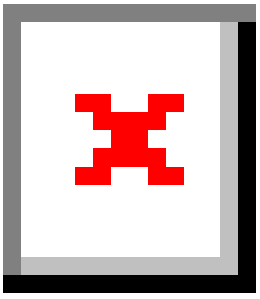












PRODUCT NEWS

Just Launched: Aspose.Words for Xamarin.Android

Wait is over! Good news for Android developers as they can use **Aspose.Words APIs** now to read, convert and combine Microsoft Word and other popular word processing file formats from within their native Android applications. **Continue reading here**.

Full Support for Microsoft Word 2013 and Enhancements in LINQ Reporting Engine

Aspose.Words for .NET 17.3.0 supports 67 new features and enhancements including full support of roundtrip to/from DOCX, variables supports in LINQ reporting engine and improved font substitution mechanism. **Continue reading here**.

Import DRC Files and Export to supported 3D File Formats

Aspose.3D for .NET 17.3.0 now supports opening Google Draco Encoded (DRC) files and saving to any 3D formats (FBX, STL, WavefrontOBJ, Discreet3DS, Univeral3D, Collada, gITF and GLB). **Continue reading here**.

Compare PowerPoint Slides and Identify Merged Tables

Aspose.Slides for .NET 17.2.0 now allows comparing two slides based on shapes, styles, texts, animation and other settings. If slides are equal, true will be returned. **Continue reading further**.

Exporting RDL Reports to EPUB Format

Apart from rendering RDL files to PDF and XPS formats – export to EPUB format is also supported now. This option is available in both ReportServer as well as in Visual Studio when using Aspose.Pdf for Reporting Services in local mode. **Continue reading here**.

FROM THE LIBRARY

How to: Embed Media Files in .NET PDF Document

With Aspose.Pdf for .NET 17.3.0 – embed audio and video files into a PDF document. Check **documentation link for C# source code**.

How to: Convert PDF to EPUB in Android Applications

Aspose.Pdf for Android 16.12.0 supports converting either a newly created or exiting PDF file to EPUB format within your Android applications. Check this **source code in Java** for further illustration.

How to: Convert PDF to PDFA_3U and Extract Chart as Image from a PDF Document

Aspose.Pdf for Java 17.2.0 has introduced PDFA_3U support in this release. Developers can also extract chart from PDF file as an image using **extractMarkedContentAsImage()** method. **Check out the code snippets here**.

How to: Calculate Excel Formulas using C++ APIs

Aspose.Cells for C++ has added more overloads of workbook calculation which provide users more control and flexibility to calculate Excel functions on runtime. Users can also implement their own custom functions if needed. **Read more here**.

OUT AND ABOUT

Supporting User Groups and Conferences

Aspose is sponsoring a number of user groups and upcoming events, including:

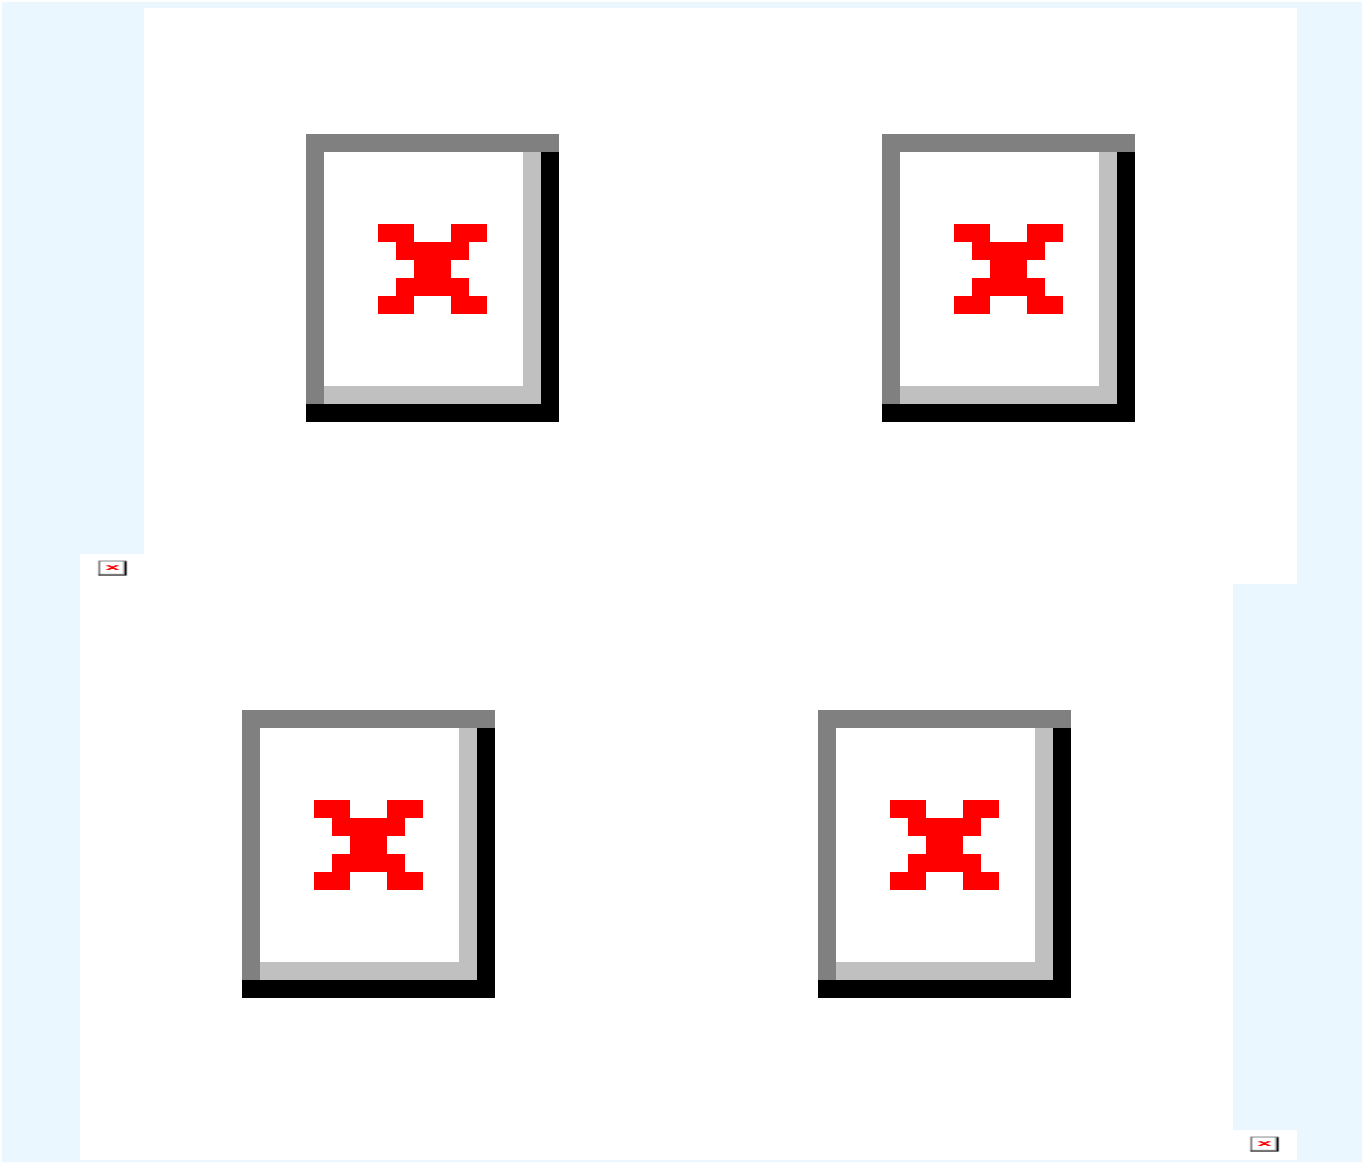
- May 10-12: Microsoft Build 2017 – Seattle – WA, USA
- May 15-18: Visual Studio Live! Austin – Austin - TX, USA

Would you like us to sponsor your user group? **Get in contact**.

FEEDBACK

How Can We Help You?

Do you have ideas for what you'd like to see us do in the coming months or have any questions for us? Reply to our newsletter or share your thoughts via the forums. We'll be happy to hear!



PRODUCT RELEASES AND UPDATES

Aspose.Total for .NET – The latest versions of our .NET APIs packaged into one product suite.
Aspose.Total for Java – The latest versions of our Java APIs packaged into one product suite.
Aspose.Total for Android – The latest versions of our Android products packaged into one product suite.
Aspose.Total for Reporting Services – The latest versions of our SSRS products packaged into one product suite.
Aspose.Total for SharePoint – The latest versions of our SharePoint products packaged into one product suite.
Aspose.Total for JasperReports – The latest versions of JasperReports products packaged into one product suite.

Aspose.Imaging – Improved synchronized access to mutually exclusive images in **Java** and **.NET**.
Aspose.Barcode - Improved memory consumption and barcode recognition processes in **Java** and **.NET**.
Aspose.Slides for Reporting Services 17.2.0 - Support for identifying merged cells inside table and comparing two slides for equality
Aspose.Cells for Cloud 17.02.0 - Lots of new features and enhancements made in this release.
Aspose.BarCode for Java 17.01 - Read Datamatrix and recognize 3D-distorted MicroQr barcodes.
Aspose.Slides - Improved text rendering in **JasperReports** and **SharePoint applications**.
Aspose.Slides for Java 17.2.0 - Improved Table and Slides comparison in Java applications.

Product News

Aspose Android APIs are Renamed to "Android via Java" and "Android via Xamarin"

Aspose Android APIs are ported from their Java APIs as they are subset components that include all the important and useful features present in their native Java APIs. Aspose.Words, Aspose.Cells and Aspose.Email for Android are following this new product naming structure now (example: If you are building native Android apps using Android Studio, the right product is **Aspose.Words for Android via Java** and if you are using Xamarin platform, you can use **Aspose.Words for Android via Xamarin**, to build your mobile apps).

Exporting Excel File to Any Supported Format using Aspose.Cells for C++ API

Programmatically read the Excel (XLS, XLSX, XLSM, XLSB), CSV or Tab Delimited files and then export to XLSX or any other file formats from Excel 97 to 2003. Continue reading here.

Apply Checksum Validation on Codabar Coded Barcode in .NET Applications

Aspose.BarCode for .NET API now exposes the CodabarChecksumMode enumeration to specify the checksum mode. EnableChecksum property of the BarCodeBuilder class is needed to be set to TRUE before setting the checksum mode. Read detailed examples here.

AutoFit Cells in Worksheet and Set Excel Page Breaks in Cloud Apps

Process Excel files using Aspose.Cells for Cloud – platform independent REST APIs. Developers can import an Excel file, autofit rows and columns of any worksheet and then save to any supported file format. Continue reading here.

From the Library

How to: Export PowerPoint Presentation to HTML in .NET and Java?

Aspose.Slides for .NET and Java now support converting a PowerPoint presentation to HTML with embedded audio and video data. Access fully functional .NET and Java code snippets here.

How to: Render Microsoft Outlook VCard Contacts to MHTML?

Aspose.Email provides support for email threading and conversion of Outlook VCard contact information to MHTML within your .NET and Java applications. This can be achieved with **MhtFormatOptions.RenderVCardInfo** enumerator while saving the message to MHTML. Access .NET and Java code snippets here for your quick reference.

How to: Permanently Delete Email Messages from PST File in .NET and Java Apps?

Aspose.Email for .NET and Java allows deleting emails from PST files on permanent basis that no other email recovery or forensic tools can retrieve ever. This feature comes handy in some legal matters where private and privileged messages are supposed to be removed prior to access. Check out .NET and Java source code examples for further illustration.

How to: Print Microsoft OneNote Documents From Your .NET Applications?

Aspose.Note for .NET 17.3 allows programmers to print OneNote documents from within their .NET applications. The Document.Print method allows sending the loaded document to default printer but you can also specify printer settings for printing the document using the PrintOptions class. View the source code here.

Out and About

Supporting User Groups and Conferences

Aspose is sponsoring a number of user groups and upcoming events, including:

- **May 10-12:** Microsoft Build 2017 – Seattle – WA, USA
- **May 15-18:** Visual Studio Live! Austin – Austin - TX, USA

Would you like us to sponsor your user group? Get in contact.
